Performance Review
September 2024

ECONOMIC ENVIRONMENT

Landing Eminent

In the third quarter of 2024, the economic climate was characterized by significant volatility, primarily influenced by

investor focus on the Federal Reserve's monetary policies. Despite these uncertainties, the global markets posted positive results, with the MSCI All Country World Index surging by 6.7%. Advanced

estimates of Q3 2024 GDP from the Bureau of Economic Analysis increased at a rate of 2.8%.

Central to the quarter's narrative was the Federal Reserve's decision to lower the federal funds rate by 50 basis points, a move that attracted broad attention and led market participants to anticipate further easing. Initially, expectations were set for at least two additional rate cuts by the end of the year. However, economic indicators have since injected skepticism regarding the extent and necessity of future rate reductions. Questions about the initial rate cut's appropriateness arose against a backdrop of moderate inflation, persistent GDP growth, and a strong labor market, which highlighted the economy's resilience and intensified debates over the Federal Reserve's future actions.

Amid these discussions, global equity markets continued their upward movement, reflecting a cautious optimism despite a complex economic environment. Noteworthy was the September Consumer Price Index (CPI), which registered higher than anticipated, signaling persistent inflationary pressures. Conversely, a spike in jobless claims to the highest level since August 2023 provided a counterbalance, suggesting potential undercurrents of economic strain.

Further indicators of economic vitality included unexpectedly strong consumer spending and continued high levels of business investment, suggesting a sustained economic drive. Lower interest rates bolstered these trends, promoting spending and investment, albeit amidst concerns about inflation, which although declining, remained a focal point for policy considerations. Unemployment rates were projected to rise modestly, but this was not seen as indicative of impending economic downturns.

The trade sector remains focal as the 2024 election approaches, with significant potential policy shifts on the horizon that could redefine trade relationships and economic strategies. Government spending, particularly on industrial policies, was expected to remain robust, supporting various sectors of the economy. However, the residential investment sector was anticipated to remain sluggish, aligning with disappointing housing data that suggested continued challenges in the real estate market.

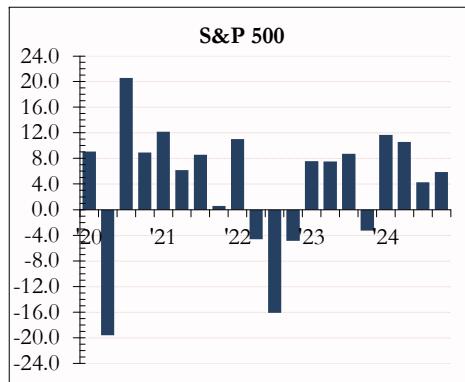

As the year progresses, the economic outlook for the remainder of 2024 hinges on the interplay between geopolitical developments,

monetary policy adjustments, and ongoing economic resilience, painting a picture of cautious optimism amid prevailing uncertainties.

DOMESTIC EQUITIES

Rising Tides

In the third quarter of 2024, the U.S. stock market continued its upward trajectory, with the S&P 500 Index notching a 5.9% gain, marking its fourth consecutive quarter of growth and pushing its

year-to-date increase to an impressive 22.1%. Small-cap stocks, as represented by the Russell 2000 Index, significantly outperformed in the quarter, registering a 9.3% rise.

Importantly, the S&P 500 Equal Weight Index led the major equity benchmarks, suggesting a more broad-based market strength beyond the heavyweight stocks that typically dominate cap-weighted indexes. However, the "Magnificent 7" stocks, which include market leaders like Nvidia, experienced notable volatility.

Ten out of eleven large-cap sectors posted gains, with one former laggard pushing all indices. Real Estate Investment Trusts (REITs) soared by 15.2%, as per the Wilshire REIT Index. The worst

performing sector was Energy which experienced another decline, continuing its downward trend amid falling oil prices.

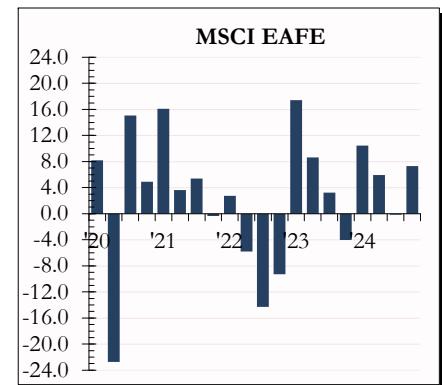

Another shift occurred in investment styles, where value stocks outshined growth stocks across all market capitalizations, a trend most pronounced among large-cap names.

INTERNATIONAL EQUITIES

Stimulating Policy

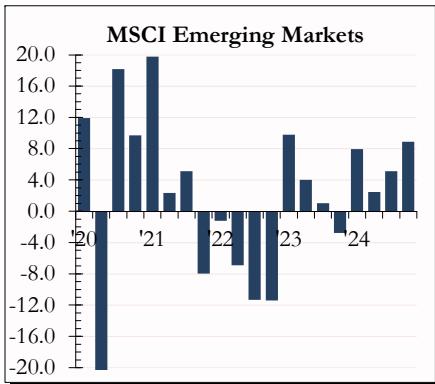

In the third quarter of 2024, the MSCI EAFE Index, representing developed markets outside North America, surged 7.3%. This rally was broad-based, with significant advances across Europe, the Far East, and the Pacific regions. The European Central Bank responded to a softening of inflation by cutting interest rates by 25 basis points in September, following a steady rate in July.

Emerging markets also delivered robust performances, with the MSCI Emerging Markets index climbing by 8.9%, buoyed by broad stimulus measures and positive political developments. Thailand emerged as a top performer, lifted by currency strength and the initial phase of a new government stimulus package. Similarly, China and South Africa posted strong gains, supported by monetary stimulus and positive political developments,

respectively. On the other hand, India and Brazil underperformed, with Brazil particularly impacted by a reversal in monetary policy and increased fiscal spending.

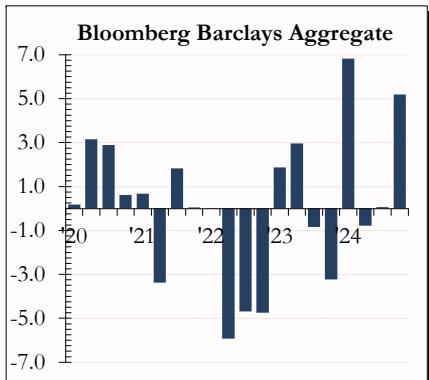

This mixed landscape underscores the complexity of global financial markets, where policy shifts and regional developments continue to drive divergent outcomes.

BOND MARKET

Confidence Abounds

In the third quarter of 2024, the Bloomberg Aggregate Bond Index demonstrated a robust performance, surging by 5.2% and turning

its year-to-date returns positive. This surge comes as yields on the index reached near two-decade highs, although spreads across most fixed income sectors tightened to less attractive levels historically. This period

marked the onset of interest rate cuts across several major economies, responding to evolving economic signals.

In the United States, the Federal Reserve initiated a cutting cycle with a substantial 50 basis points reduction. This adjustment in policy led to a notable decline in US Treasury yields, with 2-year yields decreasing by 111 basis points, highlighting a steepening yield curve that anticipates continued lower interest rates.

Amidst these changes, the bond market responded favorably, particularly in investment grade (IG) credit. Despite high valuations, the IG sector has attracted significant interest, evidenced by nearly \$800 billion in new issuances within the first five months of the year, underscoring strong investor demand and pricing that companies think is competitive.

High Yield bonds continued their strength on the year, gaining 5.3% in the quarter, as represented by the Bloomberg High Yield Index. The index is now up 9.9% for the year.

Furthermore, the Bloomberg Global Aggregate soared 7.0%, bolstered by strengthening foreign currencies against the US dollar. Notably, 30-Year STRIPS outperformed other segments of the fixed-income market, delivering a remarkable return of 11.7%.

CASH EQUIVALENTS

Interest Ebb

The three-month T-Bill index returned 0.9% for the third quarter. This is a slight decrease from the prior two quarters. Three-month treasury bills are now yielding 4.7%, down 0.7% from the end of June. Yields are expected to continue to fall. The pace of which is mired in debate.

CITY OF ALEXANDRIA DEFINED BENEFIT PLAN
POLEN CAPITAL MANAGEMENT - POLEN FOCUS GROWTH STRATEGY
PERFORMANCE REVIEW
SEPTEMBER 2024

INVESTMENT RETURN

On September 30th, 2024, the City of Alexandria Defined Benefit Plan's Polen Capital Management Polen Focus Growth Strategy portfolio was valued at \$41,273,362, a decrease of \$2,332,187 from the June ending value of \$43,605,549. Last quarter, the account recorded a net withdrawal of \$3,720,047, which overshadowed the fund's net investment return of \$1,387,860. Income receipts totaling \$64,218 and realized and unrealized capital gains of \$1,323,642 combined to produce the portfolio's net investment return.

RELATIVE PERFORMANCE

During the third quarter, the Polen Capital Management Polen Focus Growth Strategy portfolio gained 3.1%, which was 0.1% below the Russell 1000 Growth Index's return of 3.2% and ranked in the 59th percentile of the Large Cap Growth universe. Over the trailing year, the portfolio returned 27.6%, which was 14.6% below the benchmark's 42.2% performance, and ranked in the 92nd percentile. Since June 2011, the account returned 14.8% per annum. For comparison, the Russell 1000 Growth returned an annualized 16.3% over the same time frame.

ANALYSIS

At quarter end, the Polen portfolio was invested in six of the eleven industry sectors in our analysis. Compared to the Russell 1000 Growth Index, the portfolio was overweight in Financials and Health Care, while Communication Services, Consumer Discretionary, Industrials and Information Technology were underweight. The remaining sectors were left unfunded.

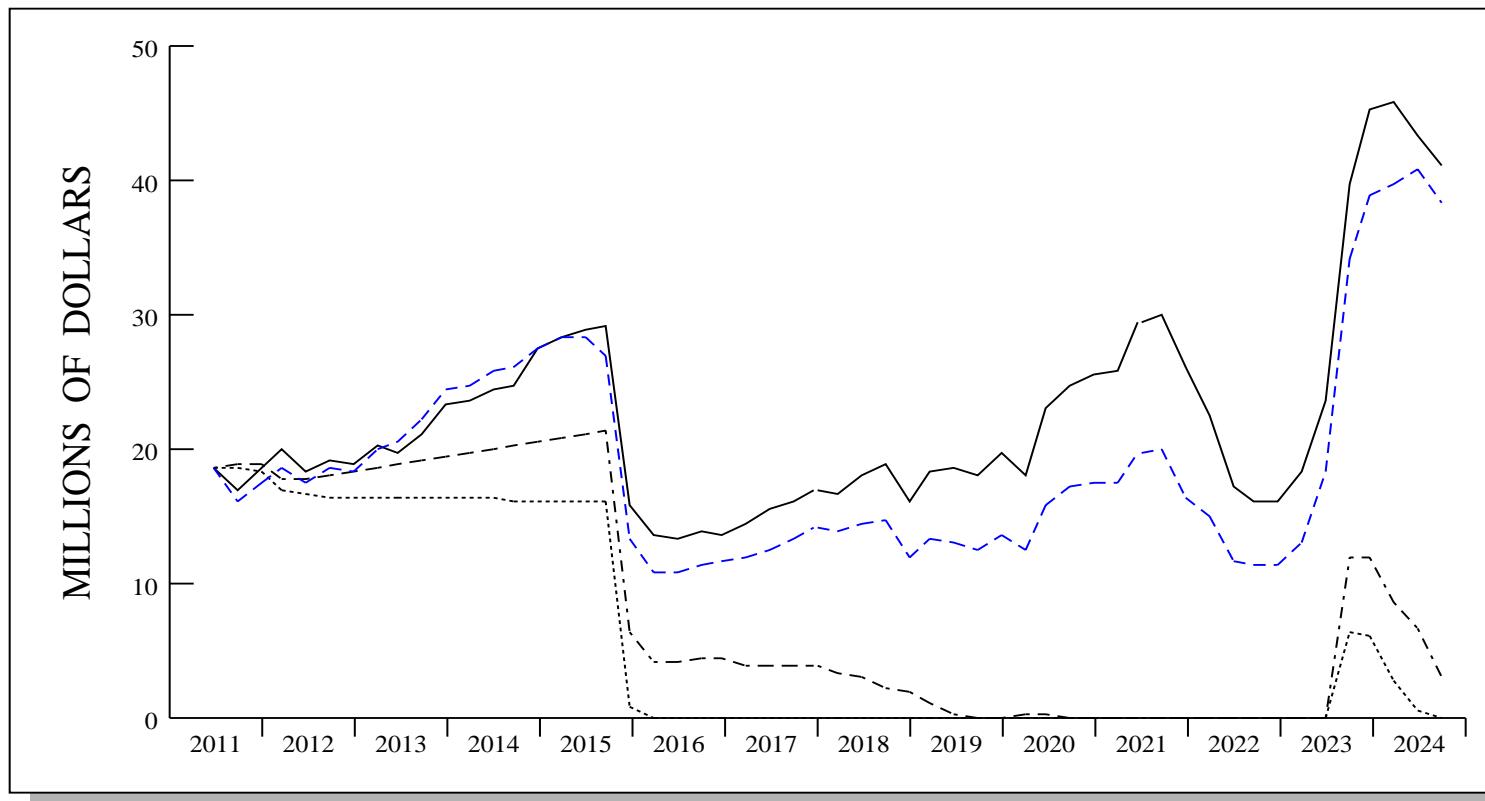

Despite its drastically divergent allocations and sector returns, the Polen portfolio circuitously arrived at the same return as its benchmark last quarter. On the plus side, the increased weight in the well-performing Financials sector added value, as did superior selection in the Health Care, Industrials, and Information Technology sectors. This was balanced against weak results in the Communication Services and Consumer Discretionary sectors.
